**Code: 8311 8358**

## How worried are you about climate change?

# UCSC Land Acknowledgement

The land on which we gather is the unceded territory of the Awaswas-speaking Uypi Tribe. The Amah Mutsun Tribal Band, comprised of the descendants of indigenous people taken to missions Santa Cruz and San Juan Bautista during Spanish colonization of the Central Coast, is today working hard to restore traditional stewardship practices on these lands and heal from historical trauma.

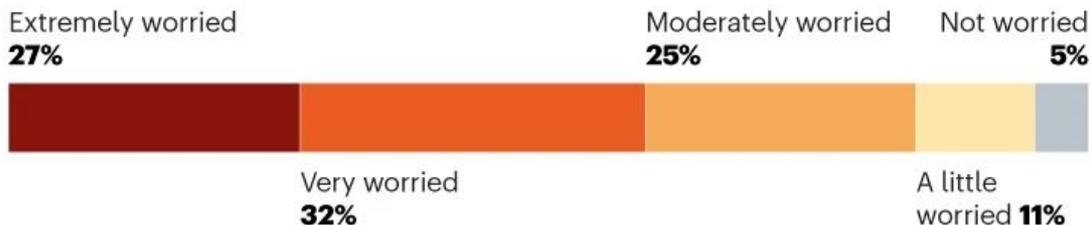

# Climate Anxiety

A survey of 10,000 young people shows that negative feelings about climate change can cause psychological distress.

Hickman *et al.*, 2021

## How worried are you about climate change?

## Climate change makes me feel...

# Decarbonization & Electrification Town Hall

# Overview of UC Santa Cruz's Emissions and Decarbonization & Electrification Work to Date

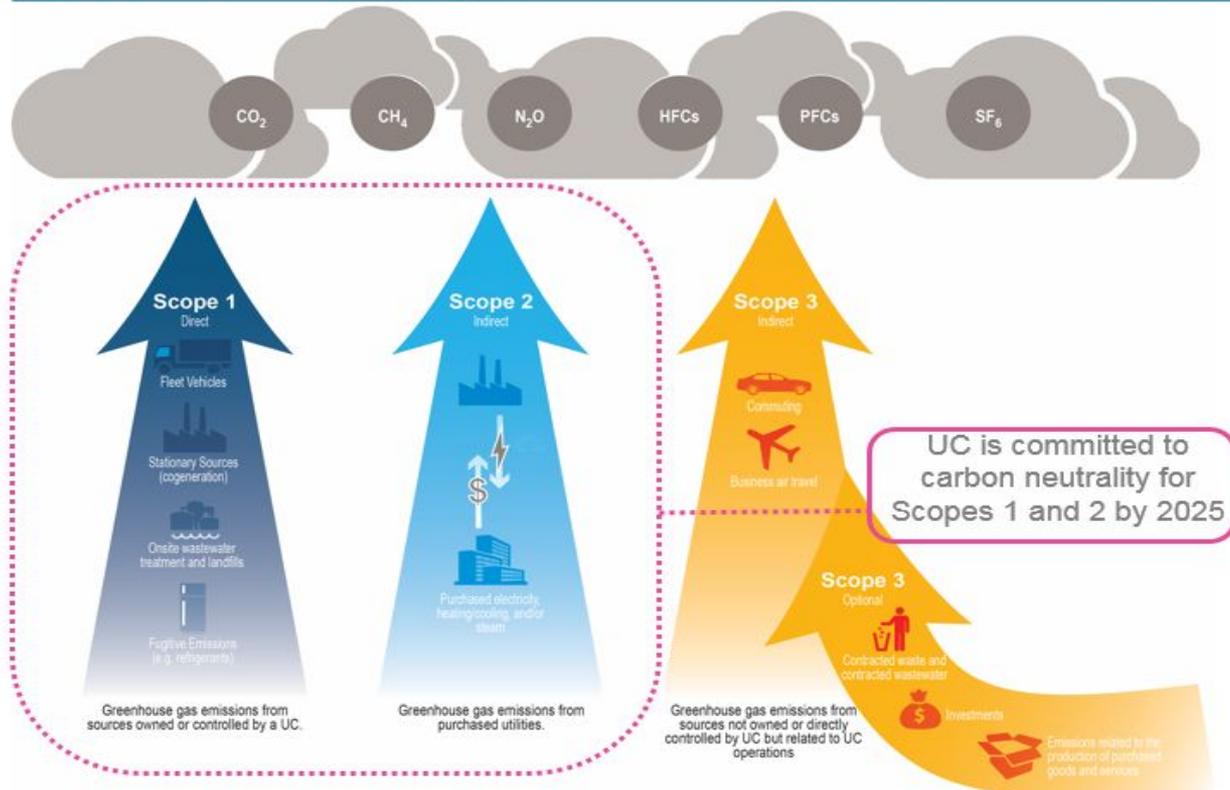

Ellen Vaughan  
Water & Climate Action Manager  
Sustainability Office

Patrick Testoni  
Energy Manager  
PPDO

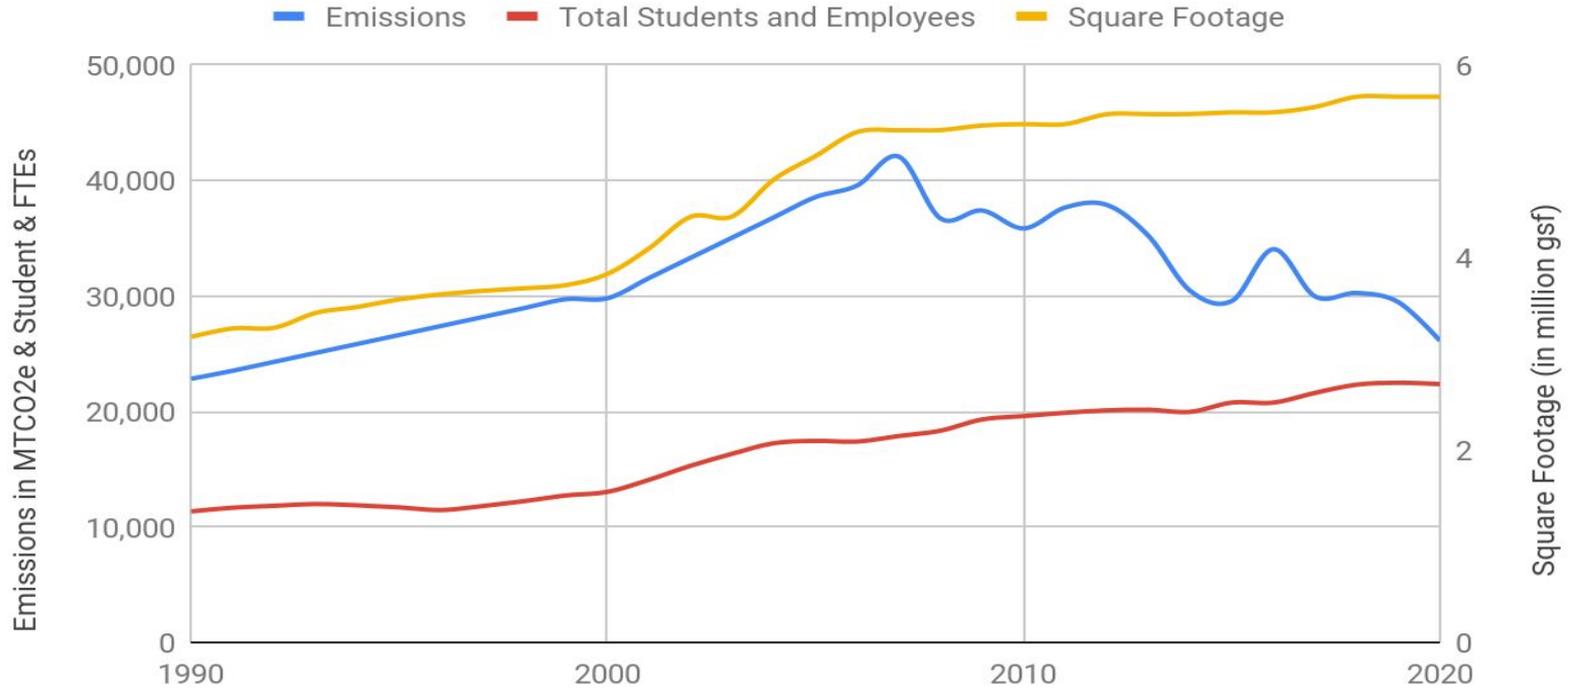

## Carbon Neutrality v. Decarbonization & Electrification

- Carbon Neutrality: achieving net zero greenhouse gas emissions by balancing what you emit with projects that mitigate emissions or sequester carbon.
- Decarbonization: not combusting fossil fuels on site. Using clean electricity instead.

# UC Carbon Neutrality Initiative

## Scope 1 & 2 Emissions & Student and Employees (FTE)

Since 1990, emissions have increased 16% while students and staff have increased 48% and square footage has increased 44%

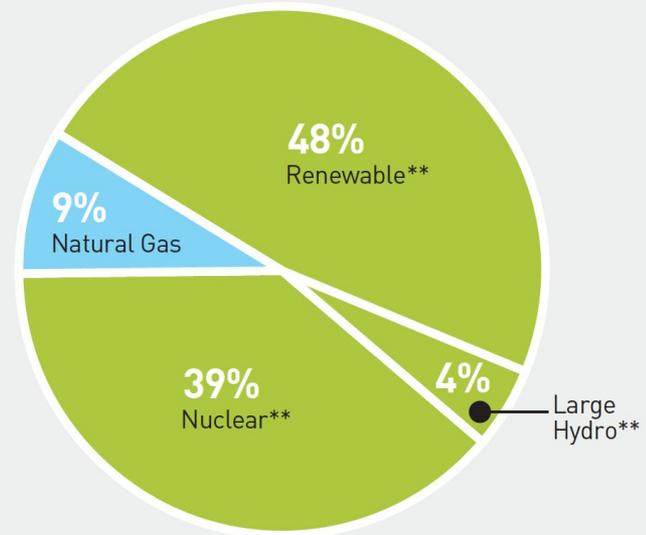

# Why electrify?

- The majority of PG&E's local grid is very clean: nuclear, solar & wind are all carbon free
- Additionally, our imported electricity is emission free from UC's Clean Power Program

## PG&E 2021

### 2021 POWER MIX\*

PG&E-owned generation and power purchases

\*Numbers are rounded for presentation. Full numbers shown on opposite page.

\*\*Greenhouse gas free and/or renewable resources

# Five Points Solar Farm in Fresno

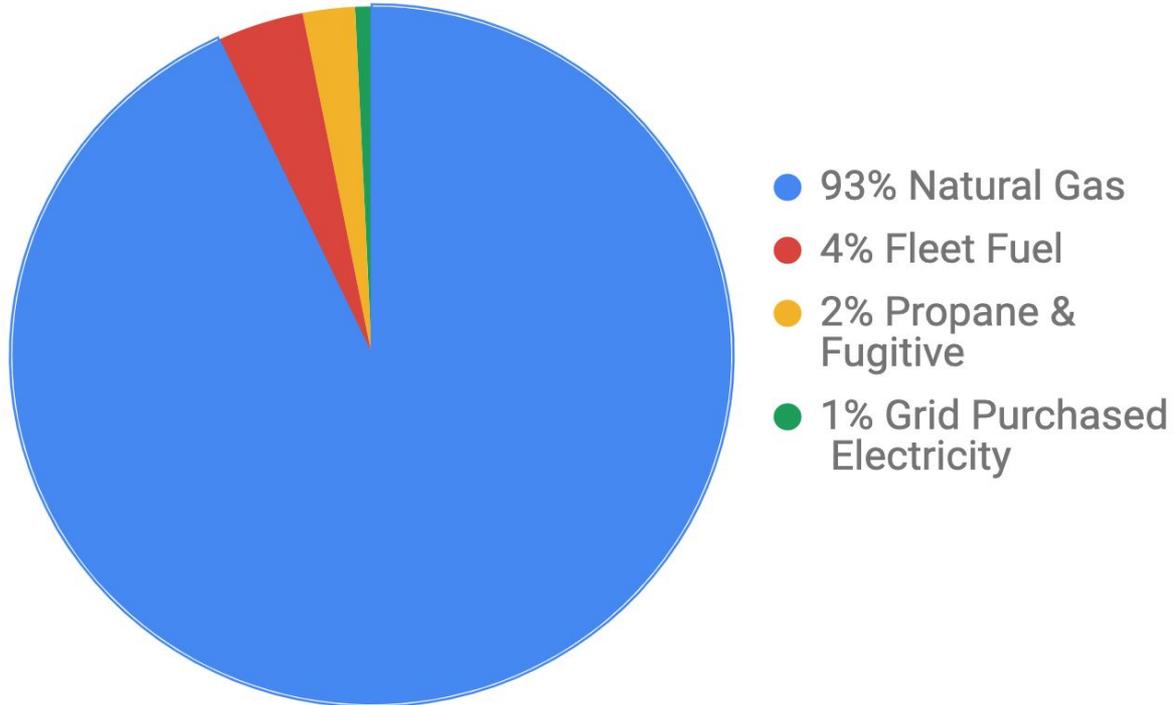

- Largest solar project built by a university in the US, composed of 271,200 solar panels
- Produces 80 megawatts of power!
- The EPA ranks the University of California No. 1 among colleges and universities when it comes to green electricity use.

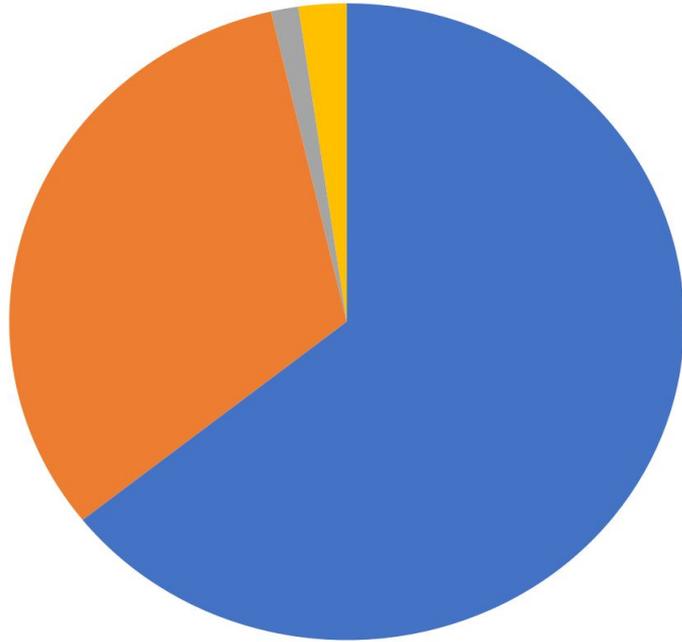

Aerial view of the Five Points Solar Farm, Fresno County.

# UCSC's Energy and Emissions

2021 UCSC Emissions by Fuel Source

# UCSC 2021 Natural Gas Use Breakdown

- Cogen Plant: 64%
- Other, Main Campus: 32%
- Westside Research Park (WRP): 1.5%
- Coastal Science Campus (CSC): 2%

# Case Study: UC Berkeley

## Natural Gas Cogeneration Plant

- 25 MW supplies 90% of campus energy
- 71% of emissions

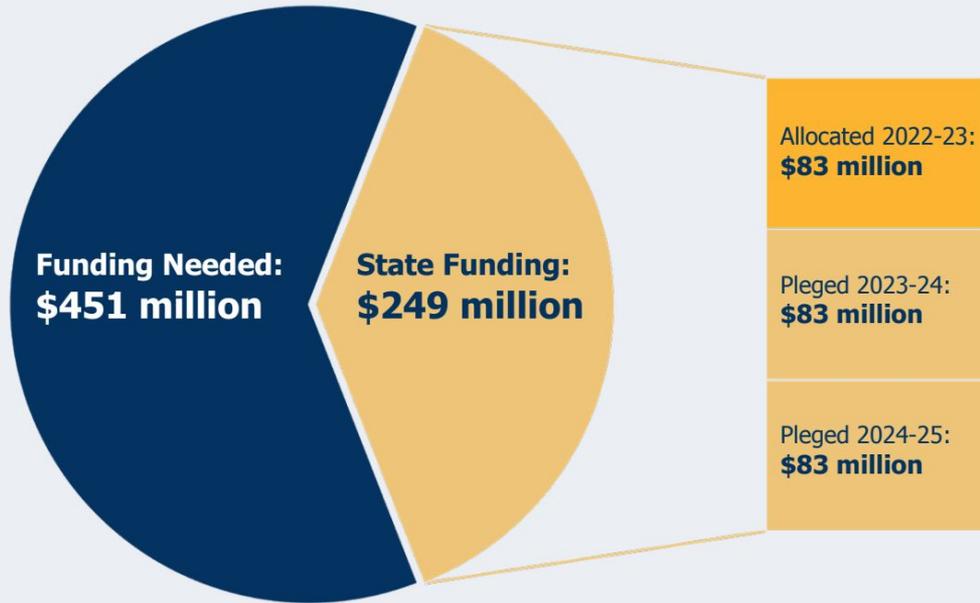

Can we pull  
this off?

## Case Study: UC Berkeley

- Construct a new central electrified thermal plant or hybrid nodal plants
  - Additionally investigating: solar, geothermal, battery, advanced building, fuel cells, only induction stoves
- Keep the cogen for resiliency?

# UC Berkeley - Funding

Current full project  
cost estimate:  
**\$800 million**

The State of California will  
invest \$249 million.

**Thank you!**

# Energy & Emission Reductions UC Santa Cruz

Patrick Testoni  
Energy Manager  
PPDO

Our Actions:  
Energy  
Reduction  
Hierarchy

Build Green

Conservation

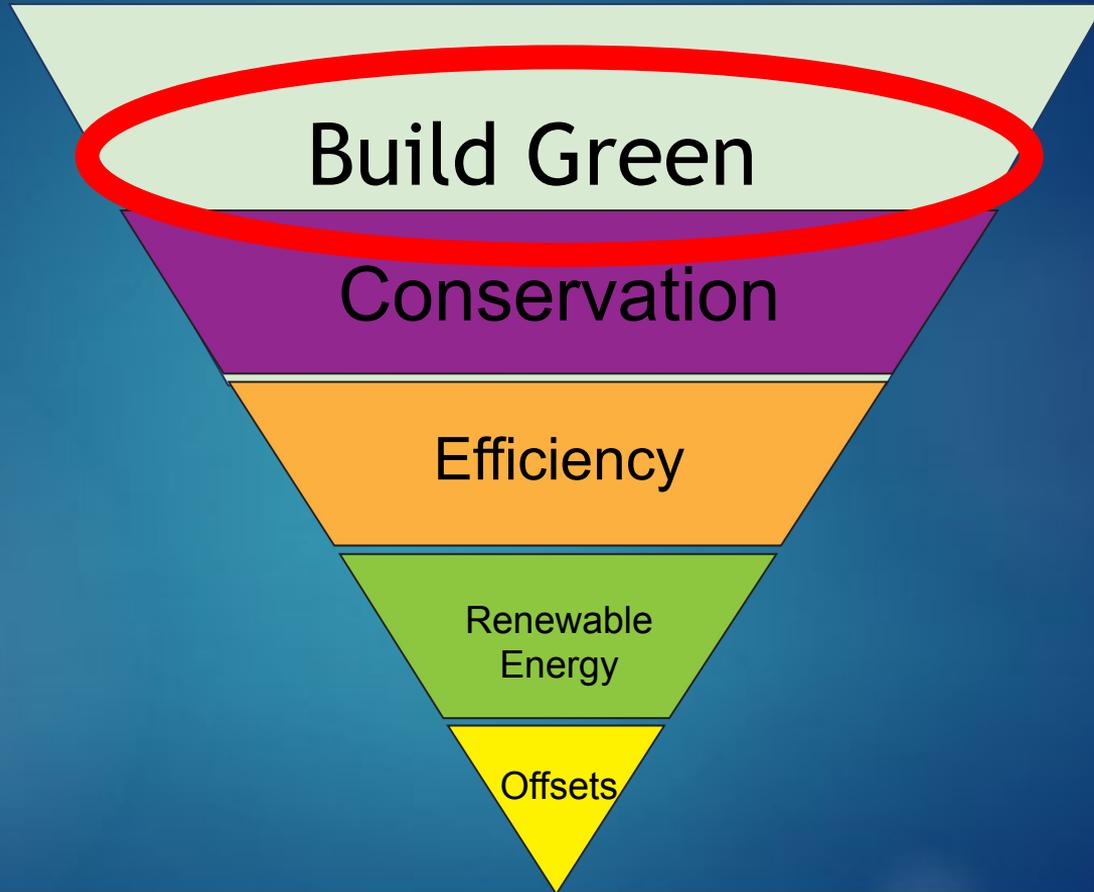

Efficiency

Renewable  
Energy

Offsets

Our Actions:  
Energy  
Reduction  
Hierarchy

## BUILD GREEN

Kresge College  
Renewal and Expansion Project

- All electric design (space heating and domestic water heating)
- Passive building design
- Energy Efficient: Designed to meet UCSC's Energy Usage Intensity (EUI) stretch goals
- Water: Dual plumbing allowing the use of non-potable water for toilet flushing

# BUILD GREEN

## STUDENT HOUSING WEST, UC SANTA CRUZ P3

Designed to meet UCSC Net Zero New Construction Goals

Zero Net Energy: Hybrid solar thermal/PV systems

Zero-Net Water: Two on-site wastewater treatment facilities = no new non-potable water use

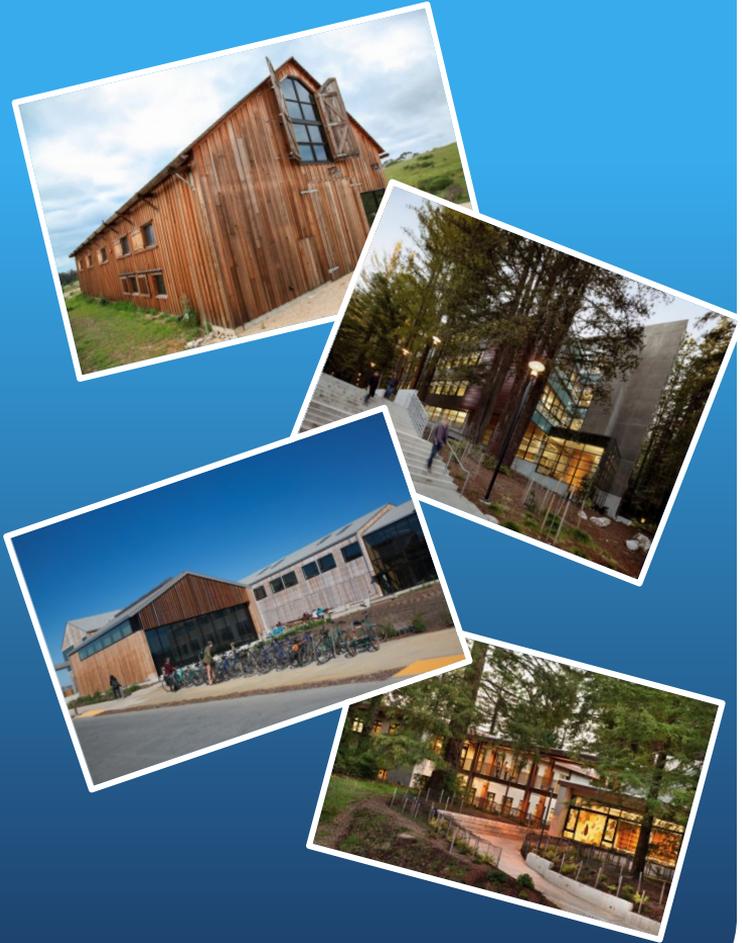

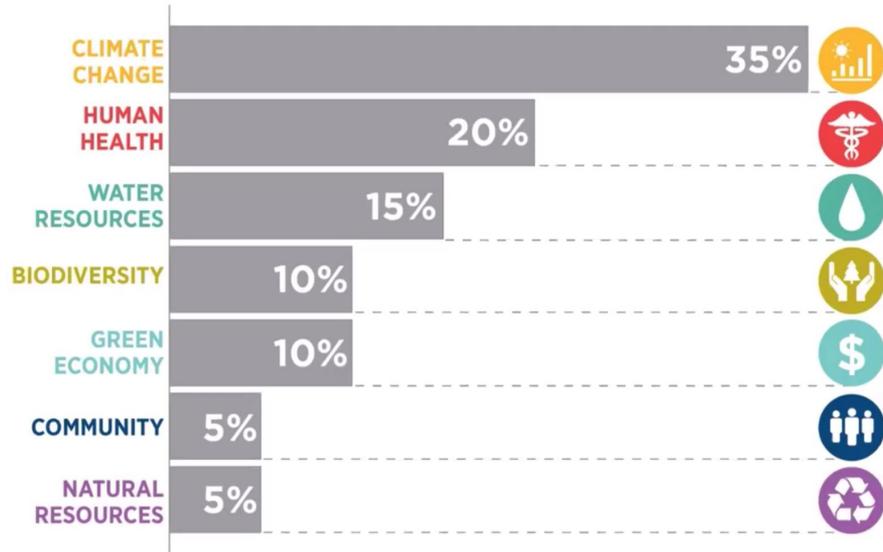

- Zero Net Waste: Designed to support UC's zero waste goals

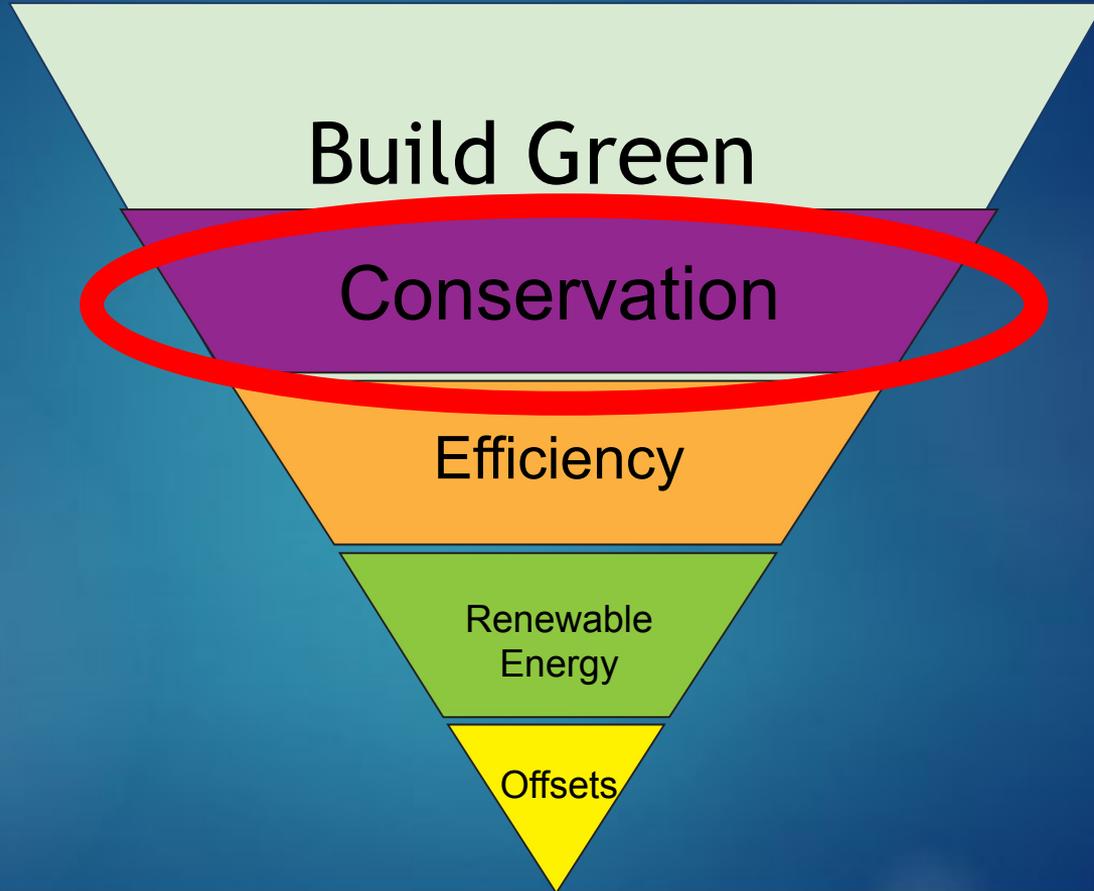

# LEED™

LEADERSHIP IN ENERGY & ENVIRONMENTAL DESIGN

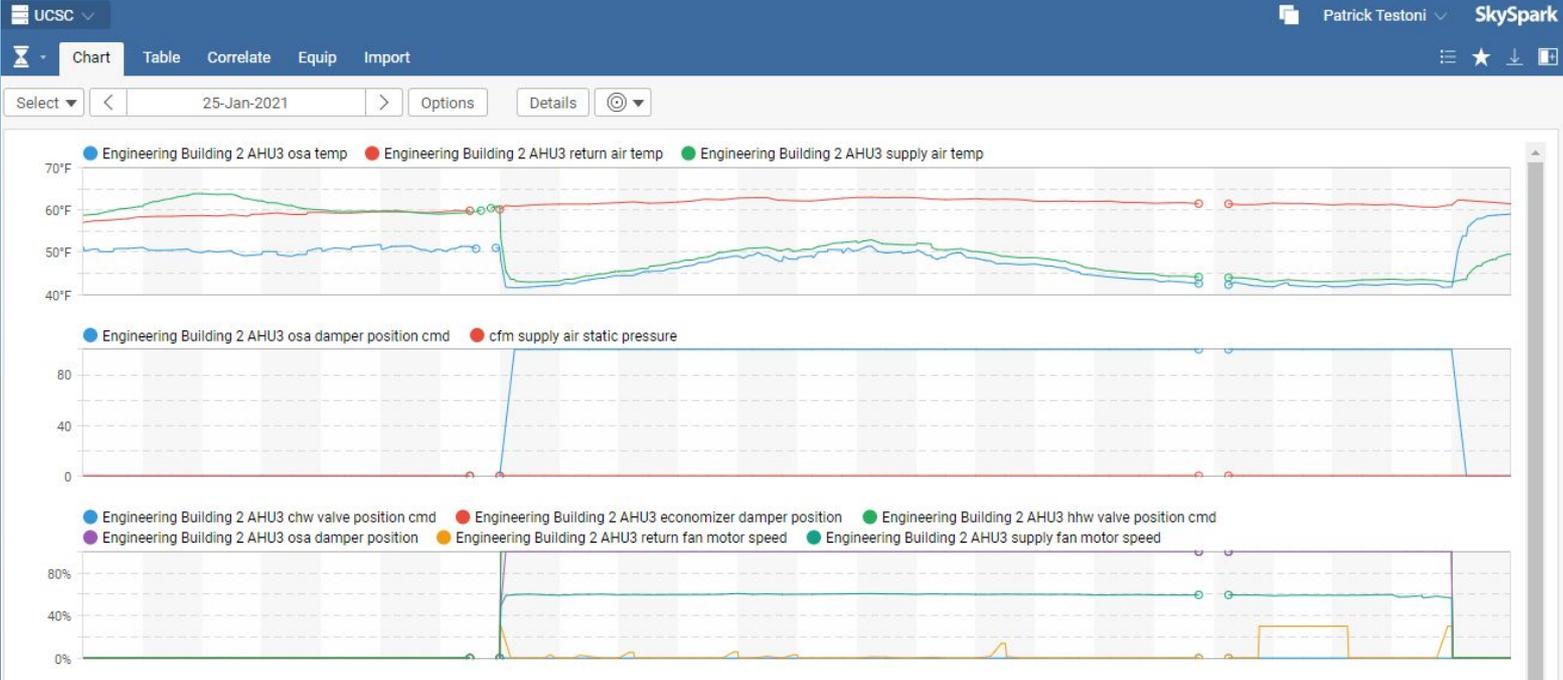

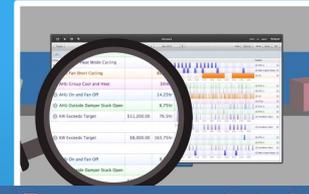

## LEED v4 SYSTEM GOALS

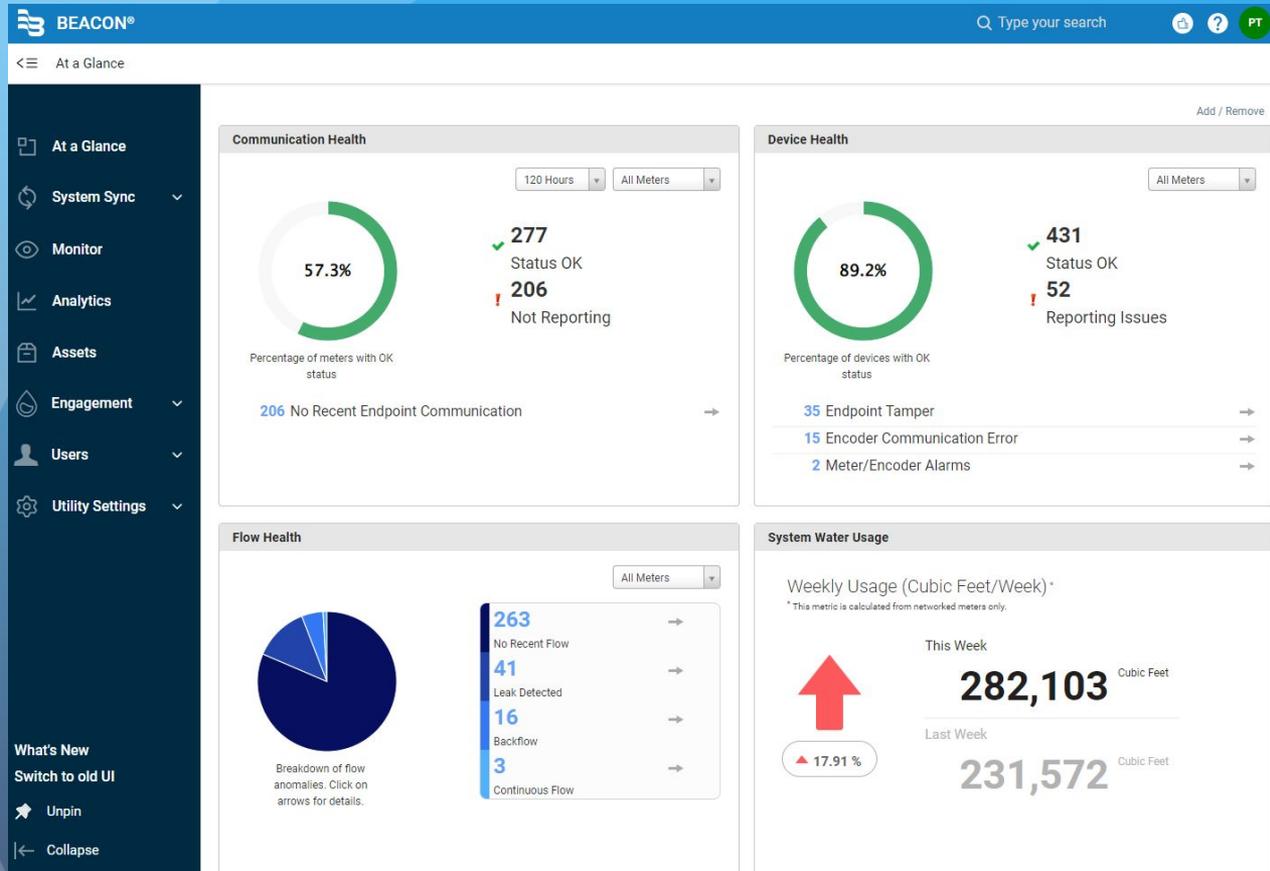

Our Actions:  
Energy  
Reduction  
Hierarchy

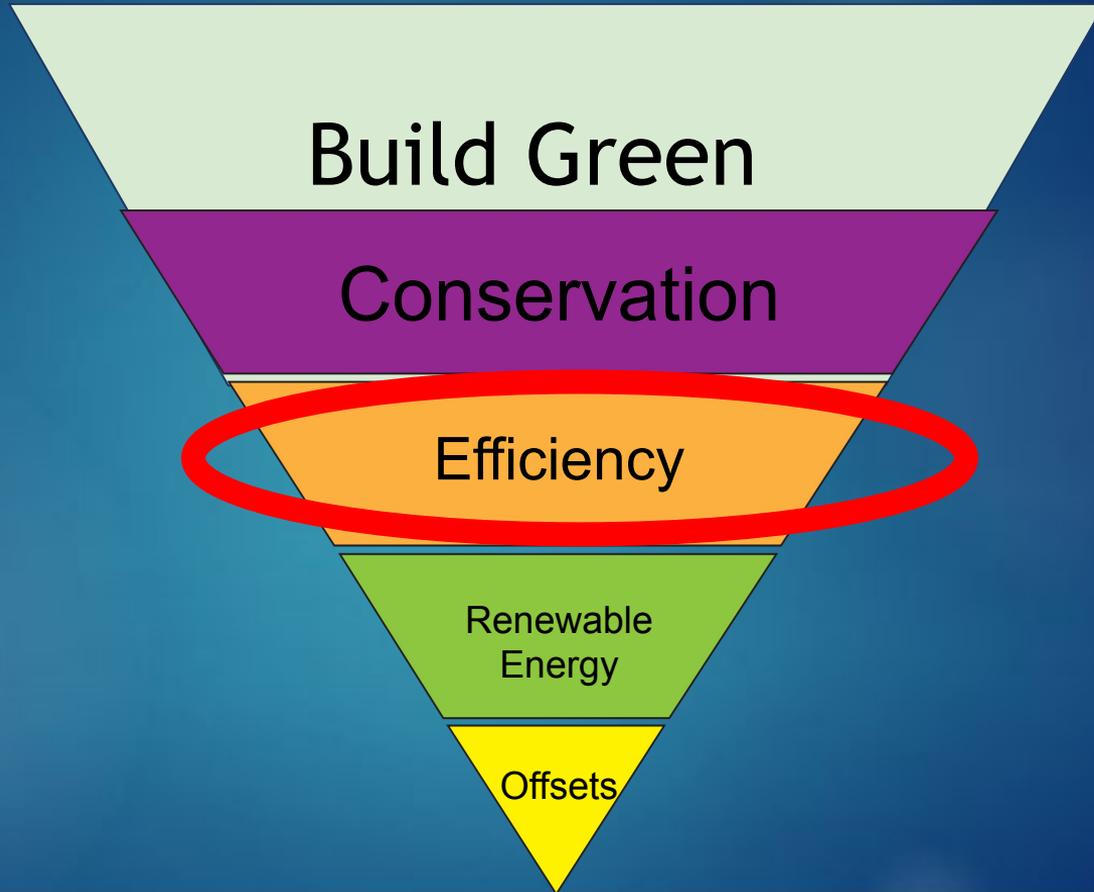

# Smart Buildings: Persistent Commissioning

# Smart Buildings: Water Monitoring and Automated Leak Detection

Our Actions:  
Energy  
Reduction  
Hierarchy

# LED Lighting Improvements Campus Wide

Convert all major buildings to LED Fixtures

- Install occupancy and daylighting controls
- Reduce building electricity use by 15-30%

# LED Lighting Improvements Campus Wide

## Buildings

Hahn Student Services (120,000 annual kWh Savings, \$385k Project Cost)

ISB (235,000 annual kWh Savings, \$770k Project Cost)

Communications Building (250,000 annual kWh Savings, \$539k Project Cost)

McHenry Library (650,000 annual kWh Savings, \$2 million Project Cost)

JBEB (770,000 annual kWh Savings, \$1.9 million Project Cost)

## Scope of Work

Replacing fluorescent lighting with LED fixtures (replacement/retrofit)

Installation of occupancy / daylight sensors and web based controls

# Heating Hot Water System Modernization Project

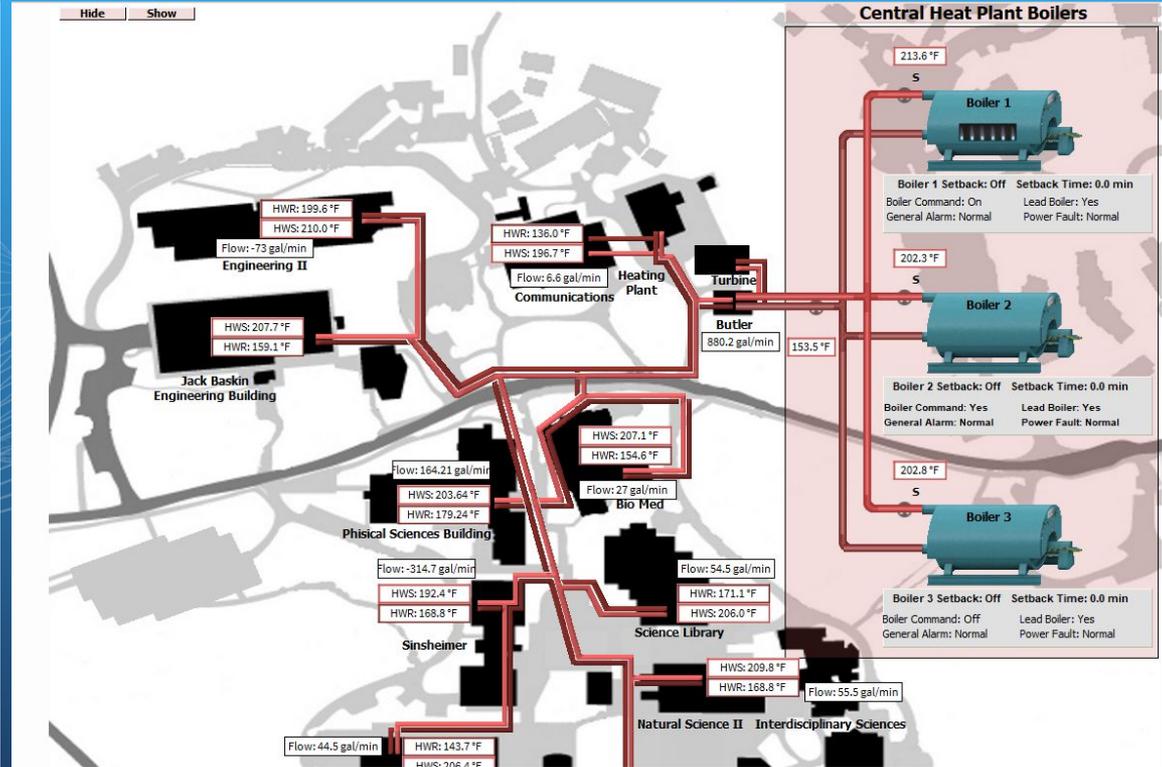

## Scope of Work

Modifications to the sequence of operations that control the heating water system

Hardware changes to the equipment that controls heating water flow from plant

145,000 annual natural gas therm savings

\$1.06 million Project Cost

# SEP Program Metrics (2005-2020)

# East Remote Solar Array

2MW array producing enough to power more than 330 houses for a year

Will provide over 6% of UCSC's electrical demand

20+ year lifespan and save \$6 million in energy costs

1 MW battery storage

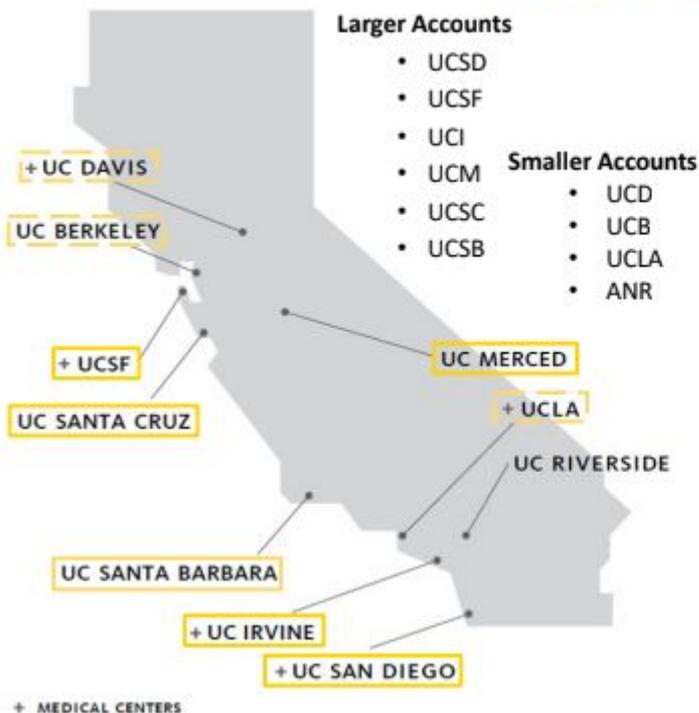

## UC Clean Power Program Overview

# Clean Power Program

- Zero carbon power (TCR verified)
- Cost competitive rates
- Multiple long-term renewable contracts
  - 2 solar projects operating
  - Additional solar PPA signed (+storage in negotiation)
  - 2 wind PPAs in negotiation
- Provides 40% of systemwide purchased electricity
- Cost transparency and collective action
- Contributes half of the voluntary renewable energy to UC's #1 EPA standing
- Provides credit towards LEED certification
- Regulatory compliance (CPUC, CAISO, CEC, EIA)

# Renewable Transportation

In February of 2019 we switched all of our campus fleet from diesel to biodiesel!

- Biodiesel derived from Ag waste
- Cost Neutral
- 25% reduction in Fleet emissions

# Utilization of Biogas

- UCOP is actively working to secure 20% of our gas needs with biogas by 2025
- That percentage will increase to 40% by 2030

# Big Run Biogas Deal Signed

- Located in Ashland, KY.
- Agreement completed in June, 2022.
- Biogas deliveries began in July.
- Flare (pictured) is now inactive.
- Receiving 182,500 MMBtu/year – slightly more than the annual fossil natural gas consumption of the UCSF Mission Bay Medical Center.

- Interviews & Scoring
- Final selection:  
**Affiliated Engineers, Inc.**

# Decarbonization & Electrification - Phases

## Phase 1

Assessment of Energy Infrastructure

## Phase 2

Development of Decarbonization Path

## Phase 3

Selection of Decarbonization Path

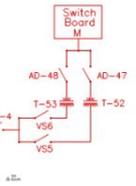

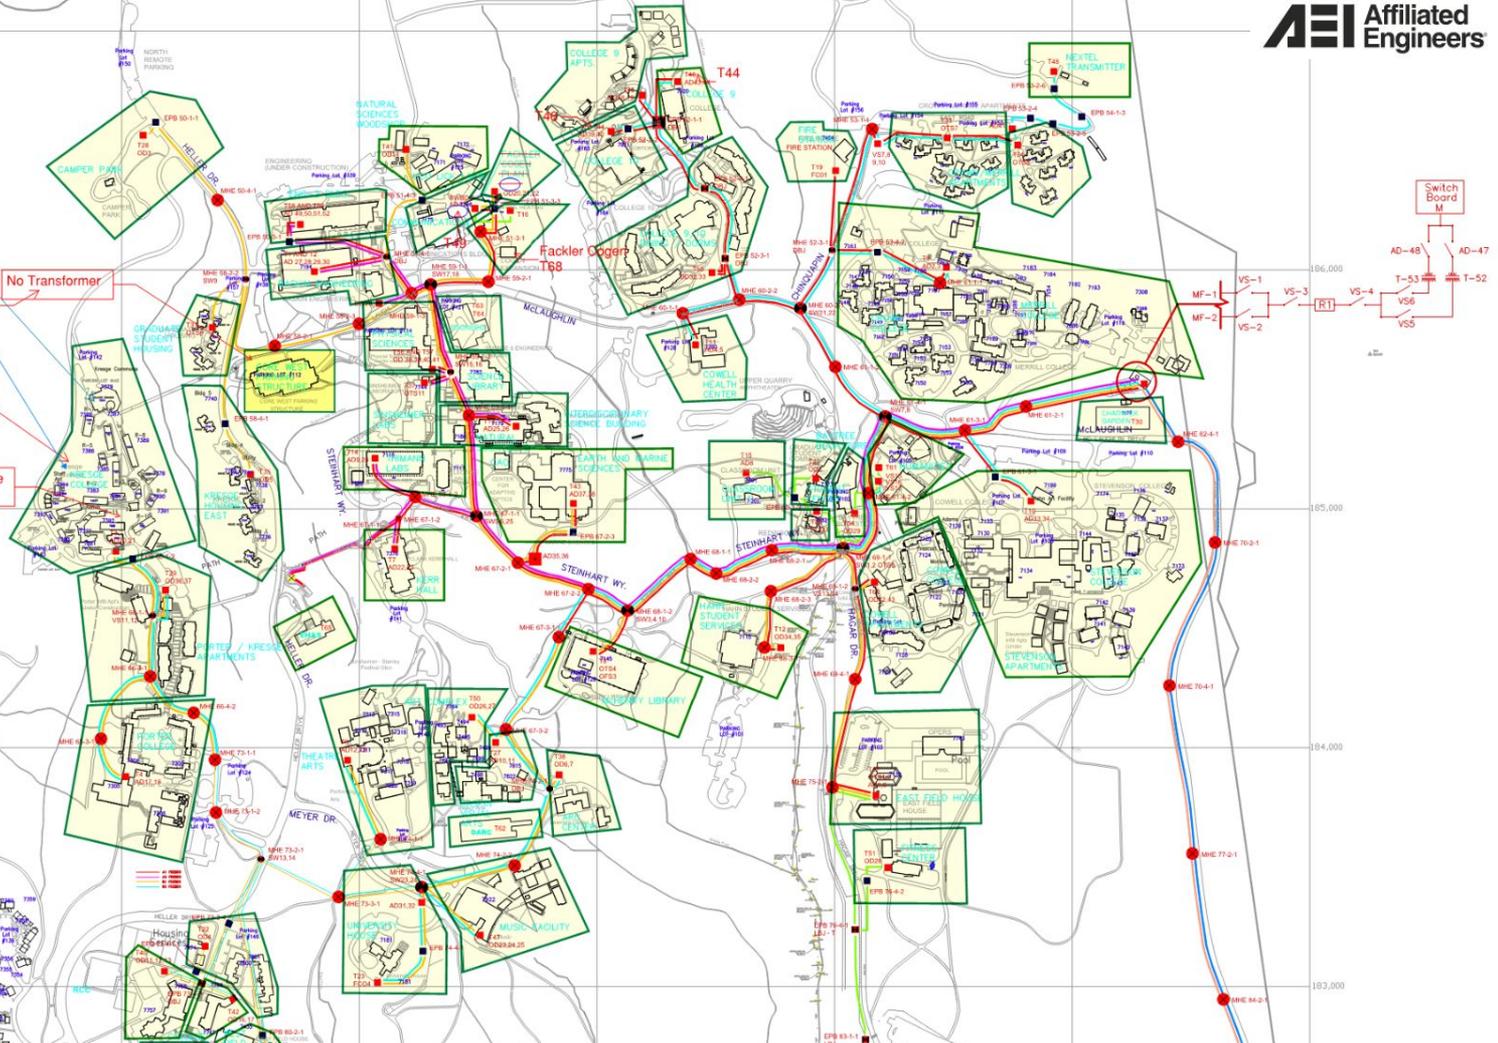

These are approximate locations of T66 and T67. The Kresge site needs to be updated to accurately show locations of T66 and T67.

Fed from T37 by way of Sinsheimer 480V distribution.

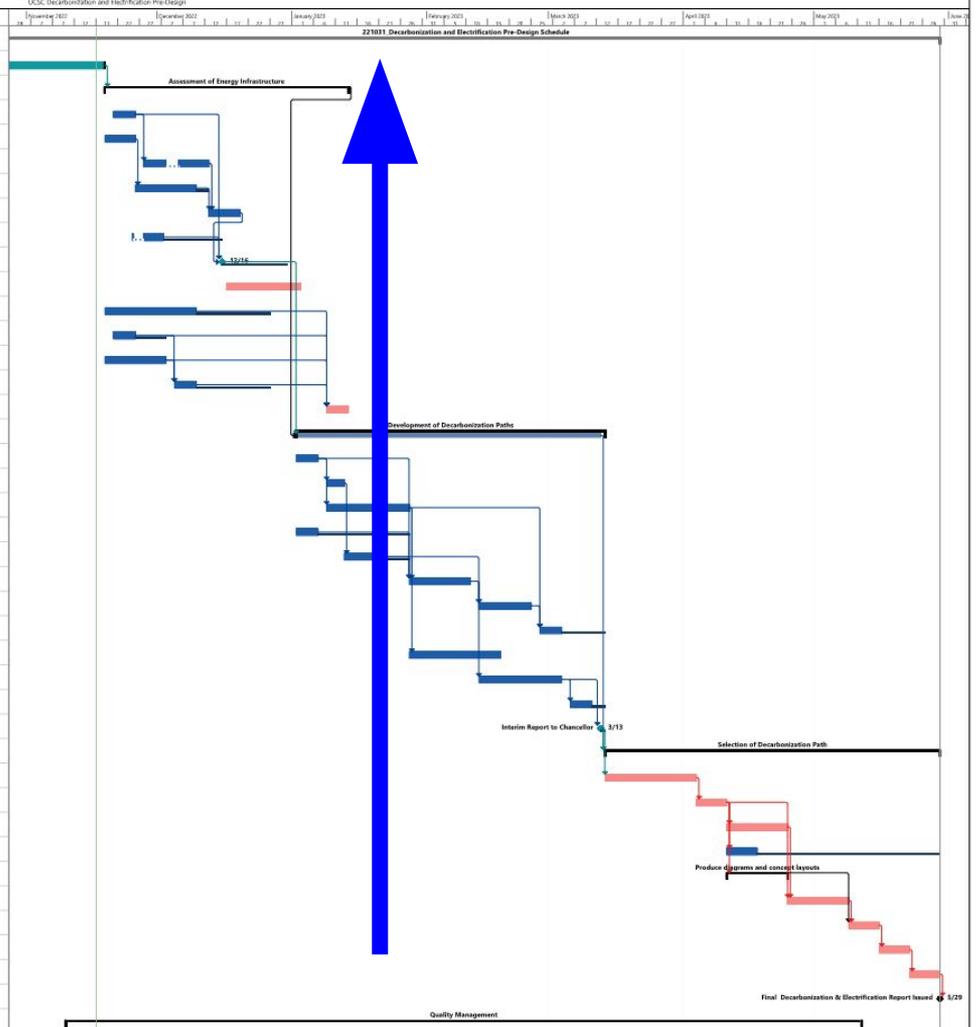

Multiple buildings demolished and under construction. Phase 2 construction to start summer 2023. Project #s 3230 and 3239.

T66 & T67 should be somewhere here

No Transformer

- Student driven initiatives

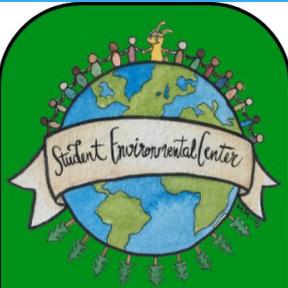

AT UC SANTA CRUZ

## Enviroslug

Collective of Student Run Sustainability Organizations

*They're  
here!*

### Student Environmental Center

SEC seeks to create lasting sustainable impacts on campus through student-run projects and is currently leading the No Time To Waste Campaign to ban single-use products at UC Santa Cruz

### Campus Sustainability Council

CSC provides funding to registered UCSC student organizations for programs and events that create, implement, and monitor environmentally sound practices on campus

### Education for Sustainable Living Program

Through UCSC accredited courses ESLP creates space for students of all backgrounds to learn the skills needed to transition toward a society that prioritizes the planet and its people

- Collective of three orgs:
  - Student Environmental Center
  - Campus Sustainability Council
  - Education for Sustainable Living Program
- Looking for new folks to join, come learn about our upcoming Zero Waste Scavenger Hunt and how you can get involved!

# Right Livelihood College

Right  
Livelihood  
COLLEGE SANTA CRUZ

- Campus community affiliated with the international organization Right Livelihood
- Undergraduate and Graduate Clubs
- UCSC courses for undergraduate students
  - ANTH 110I: Cultures of Sustainability and Social Justice
  - KRSO 78: Social and Environmental Justice Activism and the Right Livelihood Award Foundation

*“Linking activists and academics for research and education about courageous solutions to global problems.”*

*They're  
here!*

# Student Sustainability Advisors (SSA)

- UCSC Sustainability Office Student Employees
- Affiliated with the Residential Colleges

*“Student Sustainability Advisors (SSAs) are **peer-to-peer educators** who serve UC Santa Cruz's residential housing areas. These student leaders **provide programming and educational opportunities** within UC Santa Cruz's residential communities around sustainability topics, share events and information with the residents of their communities about sustainability and environmental behavior, and **serve as sustainability liaisons.**”*

# People of Color Sustainability Collective

Collaboration between the Ethnic Resource Centers, Colleges 9 and John R. Lewis, and the UCSC Sustainability Office

*“The mission of the People of Color Sustainability Collective is to **make UCSC a leader not just in mainstream sustainability, but also environmental justice**, in recognition of our changing demographics and pressing ecological challenges.”*

**They're  
here!**

# Sustainability and Environmental Justice Ambassadors

The goals of the SEJA team:

1. *increase visibility and student understanding of environmental justice through peer-to-peer education and outreach*
2. *To design accessible educational modules on environmental justice for undergraduate students*
3. *To collaborate with and elevate the visibility of organizations on campus and in the community already doing important environmental justice work.*

SUSTAINABILITY & ENVIRONMENTAL  
JUSTICE  AMBASSADORS

# Green Office & Green Labs

- UCSC Sustainability Office  
Student-Run Initiatives
- Direct campus labs and offices to  
modify their habits and protocols  
to reduce their environmental impacts.

**Sign up your office or lab today!**

# Faculty, Staff & Graduate Student Trainings

- Sustainability Certificate Program & the Diversity and Inclusion Certificate Program
- Continuing education programs designed to advance your knowledge and engagement around sustainability and diversity issues.

**Go to their websites to learn more!**

***They're  
here!***

# Carbon Fund

- Sustainability Office Student-Run Program
- Supports sustainability initiatives on campus
- Develop a team, a plan, and submit funding requests in fall quarter

*“The UCSC Carbon Fund is a granting body that funds student and staff projects that reduce our carbon footprint. We provide funding, support, and participation in sustainability projects on campus and in the community that directly reduce greenhouse gas emissions, conduct relevant research, or carry out educational programs.”*

**They're here!**

# Cool Campus Challenge

- Digital platform designed to help individuals reduce their resource use
- Open to students, faculty, staff and community members
- Learn about your personal contribution to greenhouse gas emissions and resource use, and how to reduce your impact!
- **Running Winter Quarter '23 - Active Now!**
- Join a team for your Residential College, a friend group or a class!

**They're  
here!**

# Cool Campus Challenge

## PLEDGES TAKEN

Verified

390 points

### Eliminate mini-fridge

I have shifted to use of our group fridge.

Verified

62 points

### Curtail that energy use

This has been my standard practice even closure and I will do it again this year.

Verified

380 points

### Keep sensors accurate

I never realized that there was equipment giving off heat right next to my temperature sensor at my home. I have moved them across the room. I have also adjusted the window so the sun is not shining directly on the sensor.

Verified

60 points

### Go meatless at your events

I hosted a dinner for a group of students and we all went meatless.

Verified

70 points

### Reduce vampire loads

I unplug my power strips at home when they are not in use.

Ana Bayliss Grijalva  
7 months ago

UC Santa Cruz

I watched the "The environmental cost of free two-day shipping"

Points 100  
Pounds CO<sub>2</sub>

Janet Gudino
